1 14. (Original) The method of claim 6, wherein the second party receives fees  
2 from the first party for hosting their marketing presentation.

1 15. (Currently amended) A system of providing an electronic marketing  
2 presentation, comprising:

3 a memory coupled with the processor, wherein the memory is configured to  
4 provide the processor with instructions; and

5 a processor, in response to the instructions, configured to:  
6 provide a marketing object container associated with a first party; the processor  
7 also being configured to

8 facilitate associating the marketing object container with a website, wherein the  
9 website is associated with a second party; and

10 ~~facilitating~~ facilitate automatically associating a marketing attribute and a  
11 marketing object that is compatible with the marketing attribute with the marketing object  
12 container; and  
13 facilitate automatically presenting the marketing object in the marketing object  
14 container being presented in the website associated with the second party ~~and~~  
15 ~~a memory coupled with the processor, wherein the memory is configured to~~  
16 ~~provide the processor with instructions.~~

1 16. (Currently amended) A computer program product including computer  
2 code stored on a computer readable medium, the computer code executable on a computer for  
3 providing an electronic marketing presentation, the computer program product comprising:  
4 computer code providing a marketing object container associated with a first  
5 party;  
6 computer code associating the marketing object container with a website, wherein  
7 the website is associated with a second party;  
8 computer code automatically associating a marketing attribute and a marketing  
9 object that is compatible with the marketing attribute with the marketing object container; and  
10 computer code automatically presenting the marketing object in the marketing  
11 object container being presented in the website associated with the second party.  
12 ~~a computer readable medium that stores the computer codes.~~

1 17. (Original) The computer program product of claim 16, wherein the  
2 computer readable medium is selected from the group consisting of CD-ROM, floppy disk, tape,  
3 flash memory, system memory, hard drive, and data signal embodied in a carrier wave.

1 18. (Previously presented) The method of claim 1, wherein the marketing  
2 objects that can be received by the marketing object container include a marketing object of type  
3 ad banner.

1                   19.   (Previously presented) The method of claim 1, wherein the marketing  
2 attribute is further configured to characterize the marketing object container as being configured  
3 to receive a marketing object having a cross sell feature.

1                   20.   (Canceled)

1                   21.   (Currently amended) The method of claim 20~~1~~, wherein receiving the  
2 selection of the marketing object is further responsive to a visitor attribute.

1                   22.   (Currently amended) A method of providing an electronic marketing  
2 presentation, comprising:

3                   renting out a marketing object container by a first party, wherein the marketing  
4 object container is presented in a web page associated with a second party, and the marketing  
5 object container is configured to be characterized by a marketing attribute;
